

Carrollton, Texas

Veterinary Technicians

Center for Veterinary Specialty Care is a unique place to be. We truly believe in our collegial environment where everyone has an equal part to play in the care of our patients. All employees, regardless of their job titles, are treated with dignity and respect. Our staff wrote our mission statement together and we are one team. Our values are caring, leadership, integrity and positivity.

Our work is interesting and we are always striving to learn new things. Our specialties include **neurology, surgery, ICU and critical care and internal medicine**. We have been growing for the last 5 years and plan to grow further with new specialties. We have all of the latest equipment including a CT scanner and easy access to an MRI with a 4T magnet. Technicians have a wide variety of opportunities available to them. We are one of the original members of the ACVIM foundation. Most importantly we are committed to taking care of our employees. For that reason, health, dental and vision insurance premiums are 100% employer paid and we have one of the best benefit packages in veterinary medicine. We are always looking for dedicated, caring, qualified individuals who want to be part of our vision.
